

**CASE STUDY**

The developed project using containers focuses on economical and sustainable structures to create a functional environment dedicated to sports and community growth. The main idea is to repurpose shipping containers, transforming them into multifunctional spaces for sports activities, locker rooms, storage, offices, and classrooms.

**Utility Container** > **Rigidity Structure** > **Possibility & Flexibility Community**

In summary, the project represents an innovative, low-cost, and sustainable development model capable of bringing lasting change to local communities, enhancing the potential of young people and promoting collective growth.

# PROGRAM

## WHAT DO WE DO?

### Humanitarian Projects:

We provide assistance to victims of natural disasters and support the development of African communities through initiatives aimed at improving the quality of life, addressing issues related to poverty and access to basic services.

### Sports for Change:

We believe in the power of sports, especially football, as a tool to promote social inclusion and strengthen bonds within local communities. Every year, we organize tryouts for young footballers, offering them the opportunity to grow and develop, not only as athletes but also as individuals, improving their life prospects.

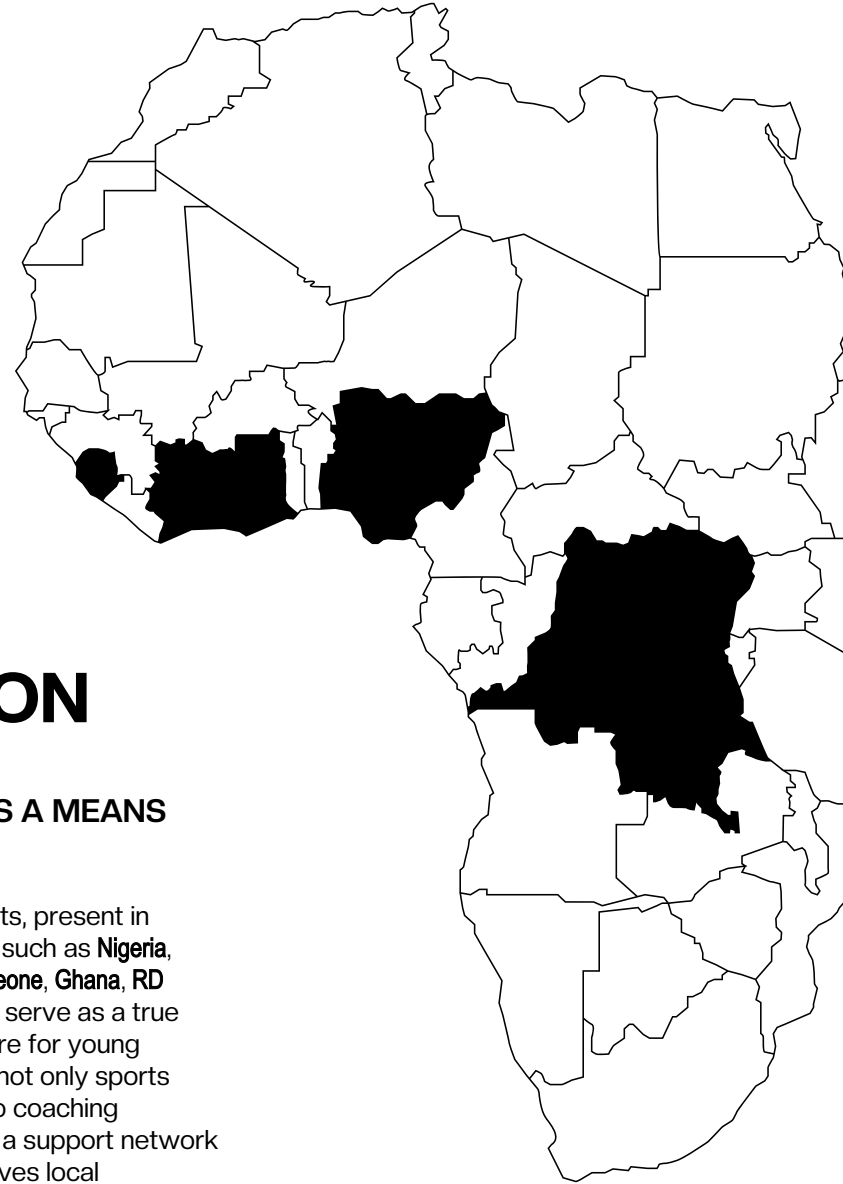

### Education:

We promote educational experiences for African students abroad and collaborate with international universities to foster cultural exchange and academic development. Additionally, we organize conferences and meetings on humanitarian issues to raise awareness and engage the public on human rights.

# GOAL

## TOGETHER FOR A BETTER FUTURE

The WE - Worldwide African Foundation was established with the goal of **promoting peace, solidarity, and respect for human rights**. Through concrete initiatives, we intervene in emergency situations and **support communities** in developing countries, particularly in Africa. We firmly believe that only through **cooperation and the involvement of everyone** can we build a more just world.

# MISSION

## FOOTBALL AS A MEANS OF CHANGE

Our sports projects, present in various countries such as **Nigeria, Ivory Coast, Sierra Leone, Ghana, RD Congo and Morocco** serve as a true bridge to the future for young people. We offer not only sports programs but also coaching courses, creating a support network that actively involves local communities.

With over 60% of the African population under 25, we believe that young people are the driving force for change. Through sports and education, we provide them with the tools to develop their potential and become agents of change in their communities.
